Van, Van

Summary

I'm a passionate front-end engineer with a strong skill set in JavaScript, Web/App UI Development, HTML/CSS, ReactJS, and React Native. My expertise spans project creation, legacy maintenance, and architecture migration. I thrive on tackling new challenges and staying up-to-date with the latest technologies. In my free time, I enjoy writing blog posts, contributing to Stack Overflow, and advocating for TypeScript in front-end development.

Employment History

Freelance Frontend Engineer (remote)

TRIBES · London, UK

06/2022 - Present

Tribes: A company serving as a developer house organization, partnering with external firms by deploying developers as agents to assist and build products.

Frontend and Business Consultant (remote)

IT&T · San Francisco, CA

06/2022 - Present

After dedicating two years to Lobox social network, I await its success. However, I've moved on and am available for IT&T consulting opportunities.

React Native Developer at Dubit (contract base) (remote)

TRIBES · Leeds, UK

06/2022 - 03/2023

I designed the architecture for a kids' podcast app, incorporating various actions and a painting module. I utilized RNTP for audio playback and React Native Skia for painting, successfully completing this challenging task. I also shared my experiences in a Medium article.

Frontend Engineer (remote)

IT&T · San Francisco, CA

07/2021 - 06/2022

After 8 months of leading the Frontend team, I decided to transfer the leadership to a better teammate who was better and fitter in this situation.

Frontend Team Lead (remote)

IT&T · San Francisco, California

12/2020 - 07/2021

Our mission was to revolutionize social networks, essentially building a LinkedIn competitor. Upon joining, I assembled a skilled team of front-end and back-end developers and established a robust project framework. I introduced ReactJS with server-side rendering (SSR), and we continue to develop both features and our team.

Frontend Engineer

Sibche · Tehran, Tehran

05/2020 - 12/2020

Managed Sibche's main iOS store app using React Native, also developing React Native-based apps for external clients, while consistently employing TypeScript and staying current with the latest tech.

Frontend Engineer

Sheypoor · Tehran, Tehran Province

05/2018 - 05/2020

At Sheypoor, a professional classified website in Iran, I gained extensive experience in React-Native, including designing UI elements, navigation, and composite components. I practised pair programming and code reviewing for web and app

development. Additionally, I prepared Android and iOS build scripts for React Native and configured tools like Webpack and ESLint.

Frontend Developer

Scann · Tehran, Tehran Province

12/2017 - 05/2018

Joined Scann, a Fintech startup, to tackle a challenging opportunity: designing and developing three large-scale apps, implementing Redux and Redux Thunk, and creating a React app boilerplate, all from scratch, using Node.js and ReactJS.

Frontend Web Developer

Digikala.com · Tehran, Tehran Province

11/2016 - 12/2017

At Digikala, my primary role was enhancing Web UI to improve UX and conversion rates. I fixed a critical, untraceable bug in the mobile app, revamped the Firefox mobile app's JavaScript, and resolved various issues. We refactored the search page into a single-page React app, but it vanished after a significant update. I contributed to the Partial Shipment project and extensively refactored Digikala Mag, separating desktop and mobile apps. My work involved a wide range of technologies and patterns, including HTML5, CSS3, responsive design, JavaScript (ES6), React, Redux, Gulp, Webpack, and more.

Technical Support Specialist and UI Developer

Douran.com · Tehran, Tehran Province

10/2010 - 11/2016

At Douran, I managed CMS sales, customer-specific tasks, and web design, focusing on wireframes to match customer preferences. I improved UX, collaborated with UI designers, gained customer authorization, and developed HTML/CSS/JS sites using Bootstrap, UI Kit, Less, SCSS, and jQuery. After 6 years, seeking new challenges and growth, I left Douran to join Digikala for career advancement and a higher salary.

Professional Skills

Web Development, Front-end Development, JavaScript, ReactJS, HTML, CSS, React Native, SCSS/Sass, Webpack, Ecmascript6+, TypeScript, Docker, Application Development, Git, Team Management, Experience with Children

Education

Master Degree

Kharazmi University · Tehran, Tehran Province

Graduated
02/2013

I have studied **Knowledge Engineering and Decision Science**, Most of the topics were about artificial intelligence and analyzing massive data for making better decisions.

Bachelor Degree

Damghan University · Damghan, Semnan Province

Graduated
07/2009

Applied Mathematics, I love it and I miss it. Applied Mathematics makes me strong in analyzing and meticulous in problem-solving.
